

PCB EAST RETURNS IN 2021

In response to customer demand, PCB East returns to Boston for 2021 for the first time since 2009!

The three-day technical conference takes place May 10-12 in Marlborough, MA. The event includes a one-day exhibition on May 11.

PCB East is a much-needed opportunity for the design community, as well as fabricators and assemblers, to get together and check out the latest technology. The show includes a range of suppliers from the ECAD, PCB design service, fabrication, and assembly supply chain.

As Covid-19 has slowed national travel, locally focused events like PCB East have become vital networking and selling opportunities.
